PROFESSIONAL SUMMARY

Senior Full Stack & Mobile Application Engineer with nearly 6 years of experience architecting high-performance, secure enterprise and fintech systems. Proven record delivering payment infrastructure processing 1M+ daily transactions, cutting page-load times by up to 80%, and shipping AI/ML-based biometric authentication into production across major Bangladeshi banks. Deep expertise in .NET Core, React/Angular, microservices, and cross-platform mobile (Xamarin/MAUI).

KEY ACHIEVEMENTS

- Engineered and optimized the payment gateway infrastructure behind Sipay, sustaining 1M+ daily transactions in production, and cut load times by 80% (PageSpeed 90+) on the AjkerDeal e-commerce platform.
- Introduced AI/ML-powered facial recognition to Bangladeshi banking at AllOne SoftTech; biometric SDKs are live in production at Bank Al Falah, Al-Arafah Islami Bank, Social Islami Bank, AB Bank, and MyCash.
- Acted as unofficial technical lead on the MyCash fintech platform, mentoring engineers and driving cross-functional delivery; also built Xamarin/MAUI applications shortlisted by Microsoft during interview evaluation.
- Designed and deployed ERP, HRM, and accounting systems on .NET Core + React with a microservices architecture, stress-tested for reliability under load.

CORE SKILLS

Languages & Frameworks: .NET Core, ASP.NET Core (MVC/Razor/Blazor), C#, Java, Android, Xamarin, .NET MAUI, Angular, React

Data & Messaging: SQL Server, Oracle, MySQL, Redis, RabbitMQ, REST APIs

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, CI/CD (GoCD), Git

Specialties: Payment Gateways, Microservices, AI/ML-based Biometric Authentication, Performance Optimization, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer — Softrobotics Bangladesh Ltd.

2024 – Present

- Built and deployed a payment gateway, ERP, HRM, and accounting platform using .NET Core, React, and a microservices architecture.
- Ran stress and load tests to validate system stability under high traffic volumes.
- Owned cloud deployments across AWS/Azure with GoCD-driven CI/CD pipelines.

Mobile & Backend Developer — HMS / Law Management — MySoft

2022 – 2024

- Delivered cross-platform mobile applications in Xamarin/MAUI for hospital management and law management systems.
- Built backend services in ASP.NET Core 8.0 using Razor and Blazor.

Senior Software Engineer, Fintech Division — AllOne SoftTech

2021 – 2022

- Developed Bangladesh's first biometric SDK for banking and mobile financial services (MFS) integration.
- Implemented AI/ML-based facial recognition for deployment across multiple banks.
- Optimized fintech applications for performance, security, and regulatory compliance.

Software Engineer, E-Commerce Division — AjkerDeal / BdJobs

2019 – 2021

- Built AjkerDeal, one of Bangladesh's largest e-commerce platforms (Web Forms), and Tiger, a leading courier delivery platform (Angular 11); shipped the country's first live-video shopping and live-chat features in e-commerce.
- Implemented .NET Core APIs powering the e-commerce, courier, and CRM panels, and delivered new BdJobs features including the AMCAT employability test — optimizing pages to consistently score above 90 on Google PageSpeed.

INDEPENDENT PORTFOLIO PROJECTS

Bus Ticketing Platform (Client + Admin Portals) | .NET 10, Angular, EF Core 10, Docker

- Full-stack ticketing platform using Clean Architecture, CQRS/MediatR, JWT with rotating refresh tokens, and an Angular admin console built with Signals.

Repo: github.com/rjporosh/bus-ticket-system

Library Management System | .NET Core 10, React / Next.js

- Full-stack library management platform pairing a .NET Core 10 backend with a React/Next.js front end.

Repo: github.com/rjporosh/Library-Management-System

Doctor Tracker — Admin Analytics Platform | Next.js, Express, MongoDB

- Admin web application with JWT auth, full CRUD, and a real-data analytics dashboard visualized with Recharts.

Repo: github.com/rjporosh/doctor-tracker

AI Email Reading Agent | LLM-powered automation

- AI agent for automated email reading and triage.

Repo: github.com/rjporosh/ai-email-reading-agent

EDUCATION

B.Sc. in Computer Science & Engineering — Gono Bishwabidyalay, 2017
