CORE SKILLS

- .NET Core / .NET 8–10, C#
- ASP.NET Core (MVC/Razor/Blazor)
- React, Angular, Next.js
- Xamarin / .NET MAUI, Android
- Microservices & REST APIs
- SQL Server, Oracle, MySQL
- Redis, RabbitMQ
- Docker, Kubernetes
- Azure, AWS, CI/CD
- Payment Gateways & Biometric AI/ML

EDUCATION

B.Sc. in Computer Science & Engineering
Gono Bishwabidyalay, 2017

LANGUAGES

Bengali — Native
English — Professional

MD. IKRAMUL ISLAM SIDDIQUE

SENIOR FULL STACK & MOBILE APPLICATION ENGINEER

6+ years · 1M+ daily transactions in production · AI/ML biometric systems live across 5 banks

PROFILE

Senior Full Stack & Mobile Application Engineer with a track record of architecting mission-critical fintech and enterprise systems from the ground up. Built and scaled payment infrastructure now processing 1M+ transactions daily, and led Bangladesh's first production AI/ML biometric authentication deployment across five major banks. Combines deep .NET Core backend expertise with modern React/Angular front ends and cross-platform mobile delivery — trusted to own systems end-to-end.

KEY ACHIEVEMENTS

- Engineered the payment gateway infrastructure behind Sipay, sustaining 1M+ daily transactions in production.
- Introduced AI/ML-powered facial recognition to Bangladeshi banking; biometric SDKs are live at Bank Al Falah, Al-Arafah Islami Bank, Social Islami Bank, AB Bank, and MyCash.
- Cut load times by 80% and pushed Google PageSpeed scores above 90 on the AjkerDeal e-commerce platform.
- Acted as unofficial technical lead on the MyCash fintech platform, mentoring engineers and driving cross-functional delivery.
- Built Xamarin/.NET MAUI applications that were shortlisted by Microsoft during interview evaluation.

PROFESSIONAL EXPERIENCE

Software Engineer — Softrobotics Bangladesh Ltd. *2024 – Present*

- Built and deployed a payment gateway, ERP, HRM, and accounting platform on .NET Core, React, and microservices; ran stress/load tests and owned AWS/Azure CI/CD pipelines.

Mobile & Backend Developer — HMS / Law Management — MySoft *2022 – 2024*

- Delivered cross-platform Xamarin/MAUI applications for hospital and law management, backed by ASP.NET Core 8.0 (Razor/Blazor) services.

Senior Software Engineer, Fintech Division — AllOne SoftTech *2021 – 2022*

- Developed Bangladesh's first biometric SDK for banking/MFS integration and implemented AI/ML facial recognition deployed across multiple banks.

Software Engineer, E-Commerce Division — AjkerDeal / BdJobs *2019 – 2021*

- Built AjkerDeal (one of Bangladesh's largest e-commerce platforms) and Tiger courier delivery (Angular 11); shipped the country's first live-video shopping and live-chat features, and .NET Core APIs across e-commerce, courier, and CRM panels.

INDEPENDENT PORTFOLIO PROJECTS

Bus Ticketing Platform (Client + Admin Portals) | *.NET 10, Angular, EF Core 10, Docker*

- Clean Architecture + CQRS/MediatR, four-provider database abstraction, JWT with rotating refresh tokens, Angular admin console built with standalone components and Signals.

Repo: github.com/rjporosh/bus-ticket-system

Library Management System | *.NET Core 10, React / Next.js*

- Full-stack library management platform pairing a .NET Core 10 backend with a React/Next.js front end.

Repo: github.com/rjporosh/Library-Management-System

Doctor Tracker — Admin Analytics Platform | *Next.js, Express, MongoDB*

- Admin web app with JWT auth, full CRUD, and a real-data analytics dashboard visualized with Recharts.

Repo: github.com/rjporosh/doctor-tracker

AI Email Reading Agent | *LLM-powered automation*

- AI agent for automated email reading and triage.

Repo: github.com/rjporosh/ai-email-reading-agent
